

Polysilicon Power Supply Solutions

- Thyrobox™ VSC
- Thyrobox™ VSC-C
- Thyrobox™ MV-I

Worldwide Supplier for Industrial Power Supply Solutions

AEG Power Supply Systems, located in Warstein-Belecke, Germany, a worldwide supplier for industrial power supply systems for over 50 years. AEG also has 25 years of experience designing, manufacturing, and commissioning custom, highly reliable and competitively priced power supply systems for polysilicon processes.

Power Supply Solutions for Polysilicon Applications

As the market leader in power supply systems for polysilicon applications, AEG delivers custom solutions specifically designed for your polysilicon reactors and processes. The power supply solutions of AEG's Thyrobox VSC employ advanced AC technology and are extremely energy efficient when compared to other technologies.

Thyrobox™ VSC – the innovative Power Supply Solution

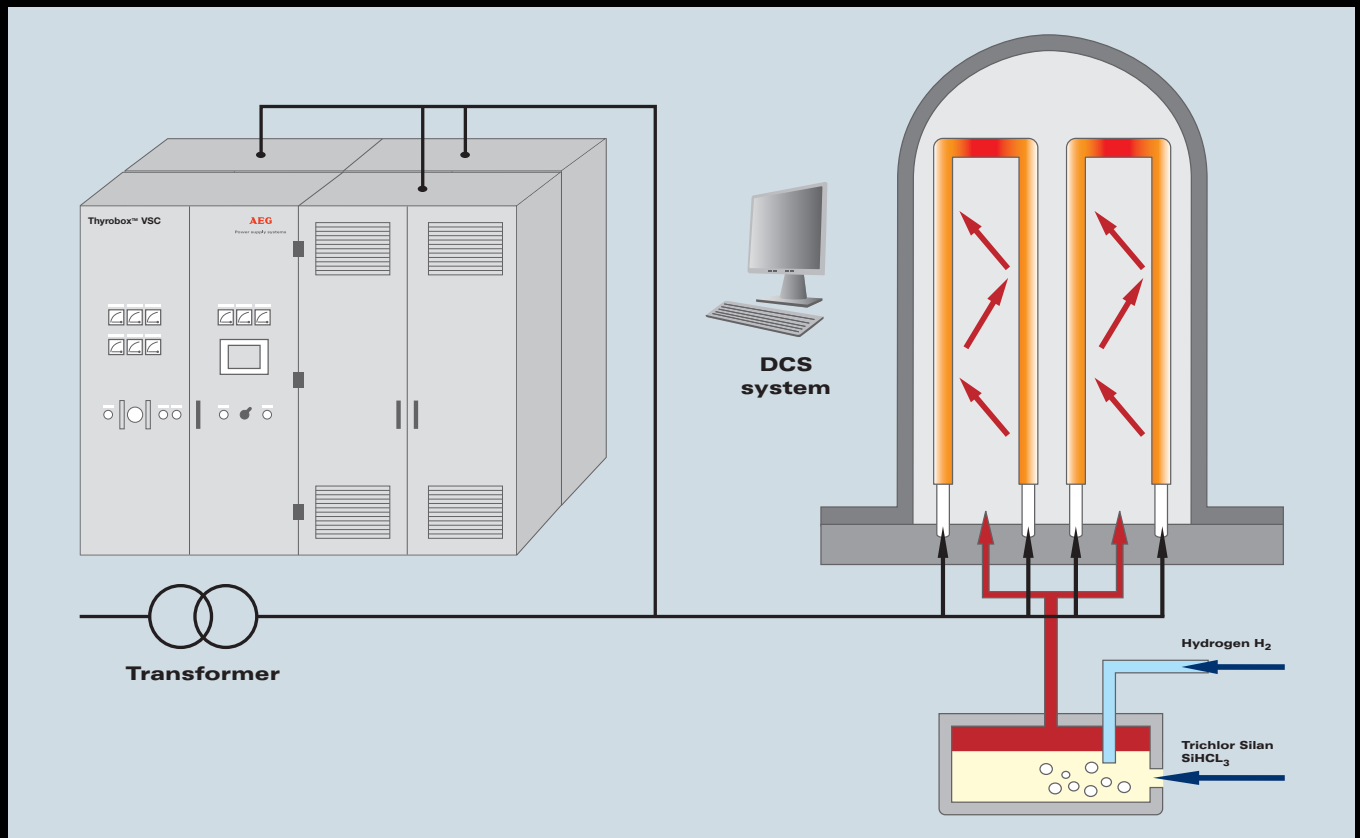

Known throughout the world, AEG's Thyrobox™ VSC power supply system is synonymous for power supply solutions with exceptional reliability and repeatability.

Examples for Thyrobox™ applications:

- | | |
|-----------------|---|
| Thyrobox™ VSC | process power supply for D-reactors
e.g. 9-pairs, 12-pairs, 18-pairs, 24-pairs
also suitable for other reactors |
| Thyrobox™ VSC-C | process power supply for H-reactors
also suitable for other reactors |
| Thyrobox™ MV-I | medium voltage starting power supply for D-reactors |

Thyrobox™ VSC in the process environment

Example: The schematic shows the Thyrobox™ VSC in the environment of a D-reactor system.

Global Service for Poly Applications

AEG supports our Thyrobox™ VSC power supplies with a staff of trained service engineers experienced in polysilicon processing and are available for the commissioning of our Thyrobox™ VSC.
